Yealink

Reimagine the Evolution of Digital Healthcare
Introducing Yealink Healthcare Solutions

Certified for **Microsoft Teams** | **zoom** Certified

Remote Healthcare is expected to grow by 33% each year until 2025, with 46% of that market being represented by real-time virtual health. Giving the fact that Telehealth is here to stay, Yealink Healthcare Solutions emerge to allow seamless communication and "in-person" like experience. With the right tools and technology, you can maintain the human care during the treatments, which is so important to the doctor-patient relationship. Making patients seen and be heard during the remote consultancy. Yealink solutions ensure healthcare resources are accessible to more people around the world.

Telehealth: A Rapidly Emerging Opportunity

The global pandemic of 2020 has changed the way health services are delivered, accelerating the adoption of telemedicine to safely deliver personalized patient care.

More Meet More Treatments
Telehealth enables physicians to meet with patients anywhere and anytime and extends the consultations and treatments to remote regions.

More Communication More Progress
Telehealth delivers better communication & training by well connecting clinical and administrative staff to reduce employee traveling for continuous education.

More Collaboration More Possibilities
Telehealth empowers collaboration across different healthcare systems and countries to maximize the utilization of medical resources and improve patient outcomes.
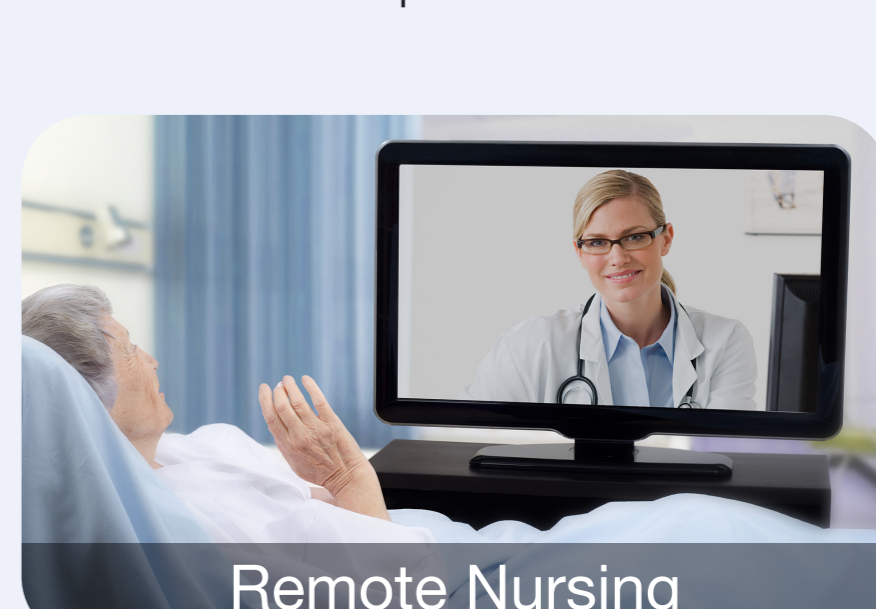

Care More and Keep Connected

Yealink's video conferencing solutions allow patients, physicians and specialists to link with each other in various scenarios, maximizing the efficiency in the utilization of medical resources through intuitive video experiences.

MVC940 for Distant Operating Rooms

Clear Scene, Precise Operation
- Multi-camera, FHD clarity, and 12x optical zooming deliver clear surgery scenarios,ensuring accurate operation of autonomous scalpels or robots and real-time control from the control room.

Hospital-Tailored Cross-Floor Deployment
- MCore of MVC940 integrates data transmission and power supply into one CAT5e cable, simplifying the complicated connections.
- Without long-distance trouble, CAT5/6 RJ45 network cable up to 100m and a normal PoE switch are the only two things needed for the deployment, which are easy and cheap to buy.

Details

A30+VP59 for Joint Consultation Rooms

Extended Healthcare Availability
- A30 delivers 1080P HD video even in low-band-width environments, enabling face-to-face consultations between patients and doctors, anytime and anywhere. Desktop video phone VP59 installed for the senior chief physician maximizes the extension of remote diagnosis.

Reliable In-Meeting Sharing
- One-click HD content sharing offers quick and clear case/patient introduction while strong encryption defends patient privacy and confidential information.

Details

A20 for Care and Attention Rooms

Real-Time Caring
- Data of patients and instruments are presented in real-time with a 1080P full HD video effect, reducing the workload of intensive care and significantly improving the monitoring efficiency.
- Doctors can perform daily patient rounds remotely through A20 with auto answering, eliminating physical movement and improving patient care efficiency. And the TV connected to A20 can be used as a patient entertainment device during normal times.

Convenient Physician-Patient Connection
- When patients and their families want to contact physicians, they can conveniently join the meeting with doctors from any device, reducing communication barriers and promoting mutual understanding.

MVC640 for Administrative Meeting Rooms

Smooth Multi-Party Experience
- Empowered with 12x optical zoom and Auto Framing, MVC640 captures the optimal view of everyone, giving all stakeholders captivating visuals.
- Anyone participating in board meetings, recruitment or project management can join conferences with one touch from PC, mobile or room terminals.

Productive Conference Communication
- Working with MSpeech, MVC640 offers intelligent features like voice transcription and real-time translation, making communication more effective.
- Organizers can also simply chat with the Cortana voice assistant for meeting control function such as scheduling meetings and inviting attendees.

Details

MVC960 for Seminars & Training Rooms

Pro-Grade Video Experience
- MVC960 supports large-scale 4K HD video live streaming. Experts can perform centralized training or medical communication with primary hospitals flexibly.
- The Presenter Tracking feature always keeps the instructor in the center of the screen, allowing distant participants to clearly see case presentations or medical operations.

Enhanced Academic Collaboration
- Communicate with other physicians and experts through annotations and one-click content sharing directly on the sharing screen to make the seminar or training more informative and productive.
