

BARNSELEY HOSPITAL NHS FOUNDATION TRUST

MAXIMISING DIGITAL TRANSFORMATION BENEFITS VIA AN INTEGRATED END-TO-END SOLUTION

“It’s easier to see associated symptoms and conditions, aiding decision-making throughout the patient journey; from consultation to diagnosis and treatment.”

BARNSELEY HOSPITAL
NHS FOUNDATION TRUST

- Improved clinician and patient experience
- Reduced risk of privacy breaches plus time and space savings
- Future-proofed solution enabling patient access to records
- End-to-end data security with clear compliance audit trails

CHALLENGE

Barnsley Hospital NHS Foundation Trust wanted to digitise 184,000 patient records, optimising clinical efficiency and administration while creating a future capability for patients to view their records online.

SOLUTIONS

Delivering a fully integrated end-to-end EDMS and digitisation solution, Iron Mountain provides file collection, indexing, imaging and access to records via a secure platform that is fully integrated into Barnsley's EPR system.

RESULTS

Along with time and space savings and decreased risk of loss or inadvertent disclosure Barnsley can drive more value from patient data through integrated case management, better decision-making and efficient digital workflows. Patients will also eventually benefit from remote access to records.

Full digitisation programme
with a single provider

Automated PAS engagement,
enabling pre-appointment
scanning of legacy files

74 million
digital images on target

Improved experience
for clinicians and patients
