Mago Room

Effortlessly join video conference meetings with one-tap from room calendars

Get your entire team – no matter where they are located – together with support for over 20 VC systems. Mago Room displays scheduled meetings and allows participants to easily join them with just one tap.

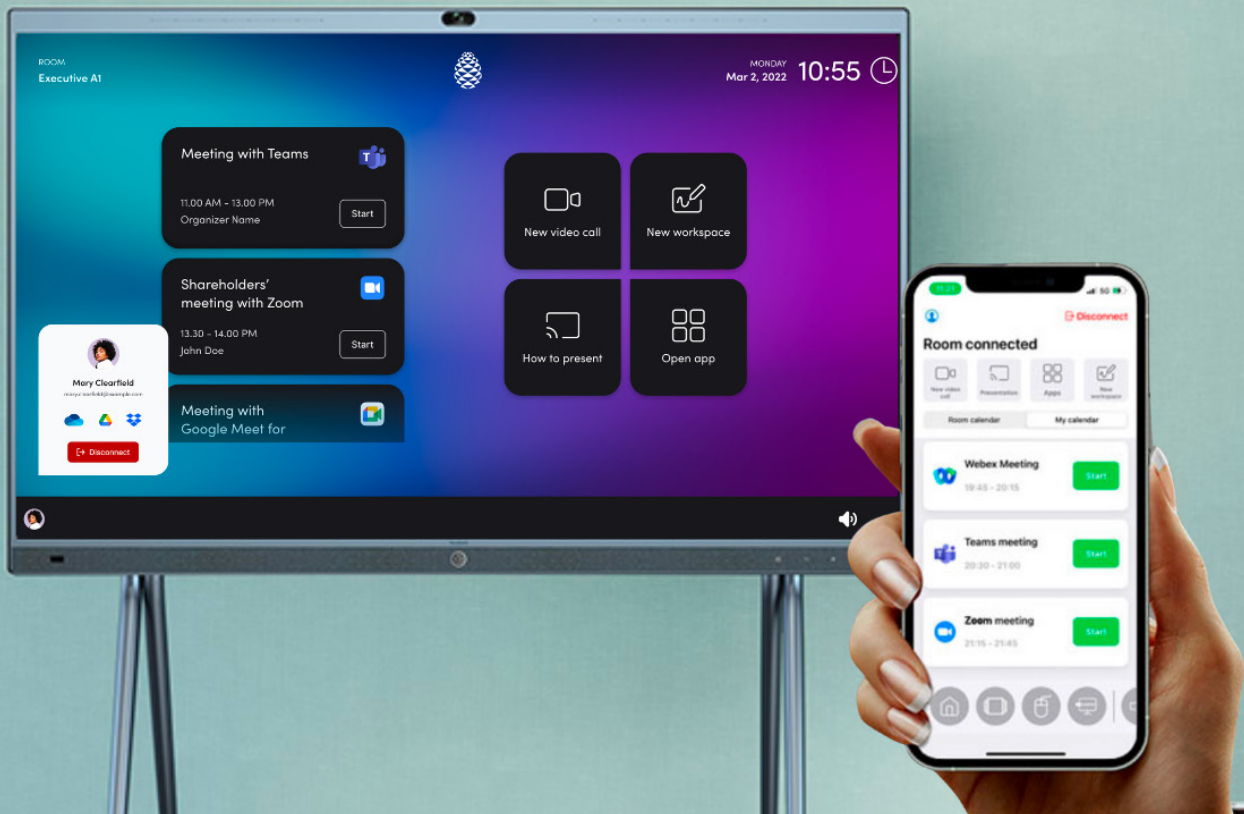

Mago Room is compatible with UC systems such as Microsoft Teams, Zoom, Cisco Webex, etc., enhancing both in-room and remote meeting experiences for greater productivity.

In a room equipped with Mago Room, all the user needs to do is press the “start” button on the meeting displayed on the screen to join effortlessly.

Integrates 20+ VC systems:

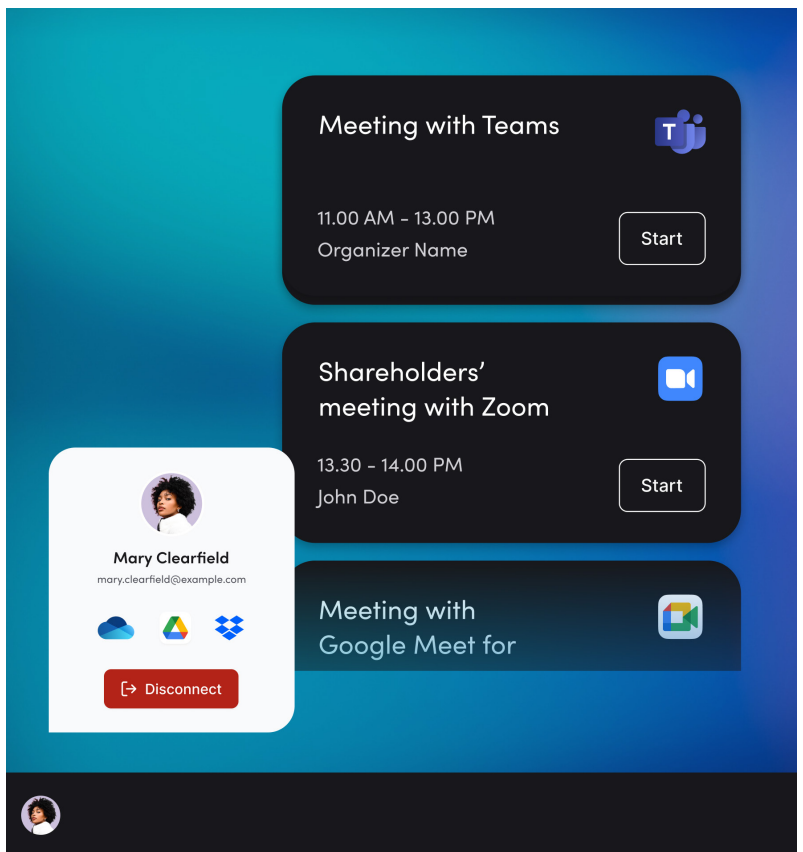

Seamlessly participate in meetings with a QR code from personal calendars

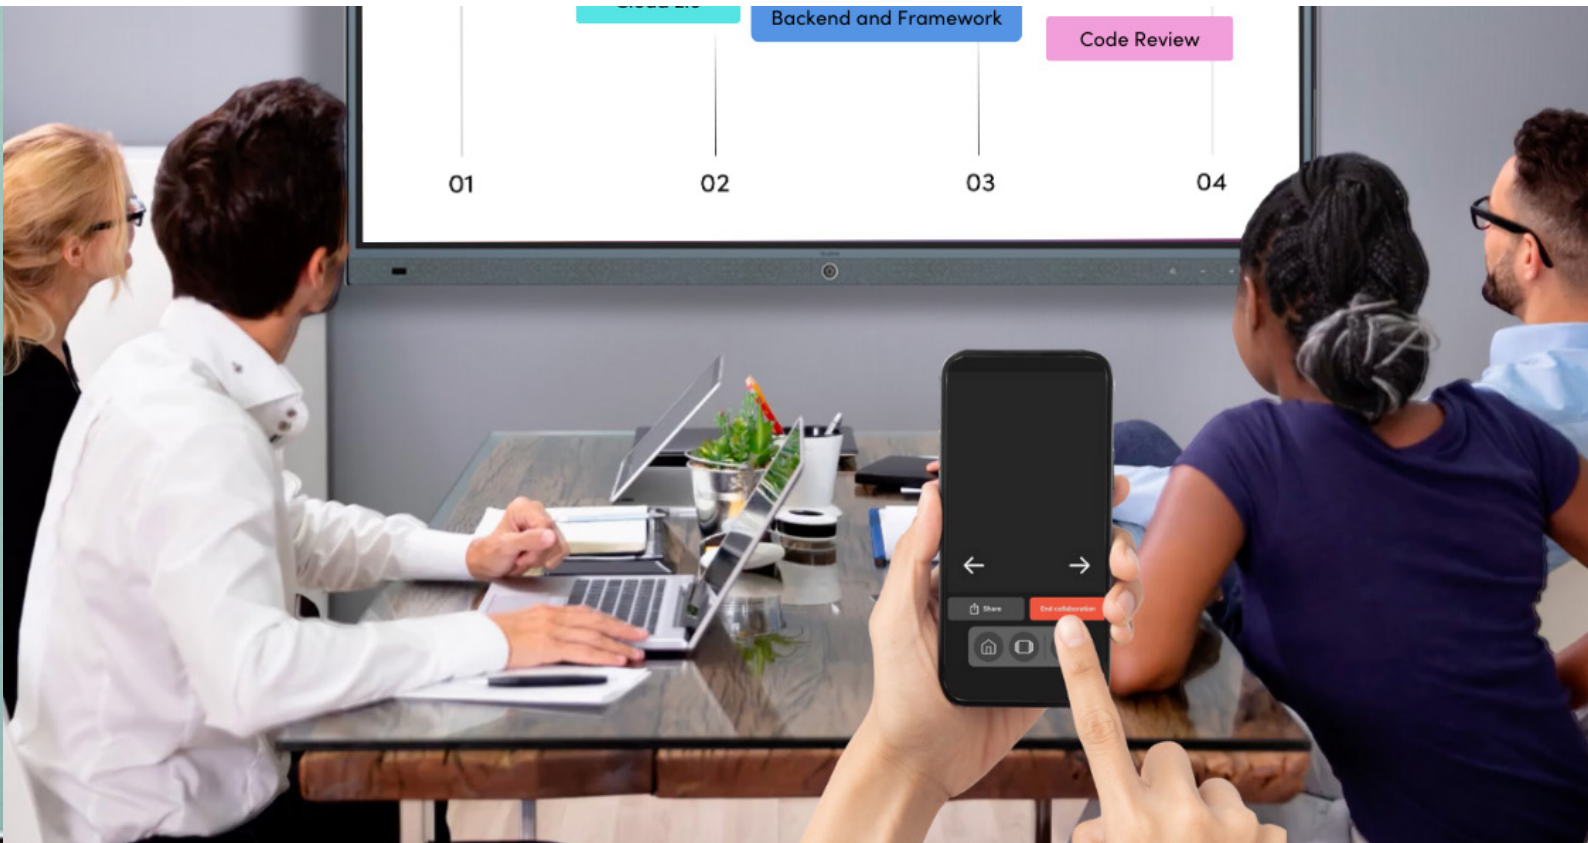

Through connections with Microsoft 365 or Google Calendar, you can join or start personal meetings almost instantaneously. Mago, with full-screen video conferencing, makes worldwide collaboration smooth and seamless.

Users can download the free Mago Workspace_{App} and simply scan a QR code to synchronize their personal calendars and integrate them with room calendars, taking control of the meeting with an intuitive, secure, and branded application launcher.

Join meetings from both personal and room calendars with MagoWorkspace app.

Available for:

Present your way

 **Airplay, Google Cast, Miracast powered by AirServer™**

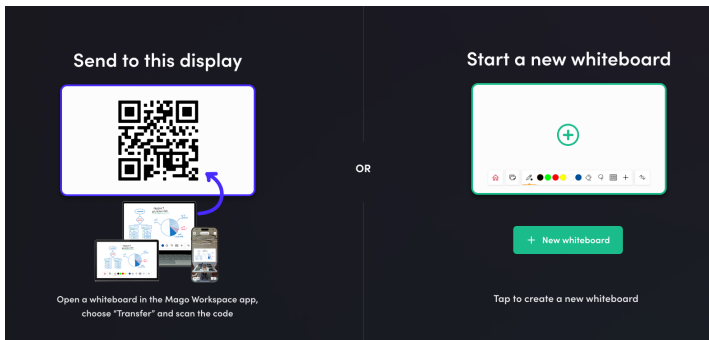

Project multiple screens and devices at the same time. Capture your casted content with a tap and brainstorm with Mago Workspace canvas.

 **Use Chrome Browser for PC or Mac**

Share any tab, window or screen from your browser without installing any application.

 **PIN code connect with Magolink**

Ensure presenters share their content to the correct display and prevent unwanted streams.

 **Mago Workspace app**

Browse your Cloud drives on the big screen. Present, collaborate and co-author your files directly without moving them out of your secure Cloud drives. Works with Onedrive, Google Drive and Dropbox.

 **Multi-network support**

No need to connect to the same network to present from your device. Mago Room can cast content without compromising the security of your internal network, and it works even if your device is connected to a cellular network. Ensuring security by checking the physical presence.

Start screen sharing and create a new whiteboard on the interactive

Available for:

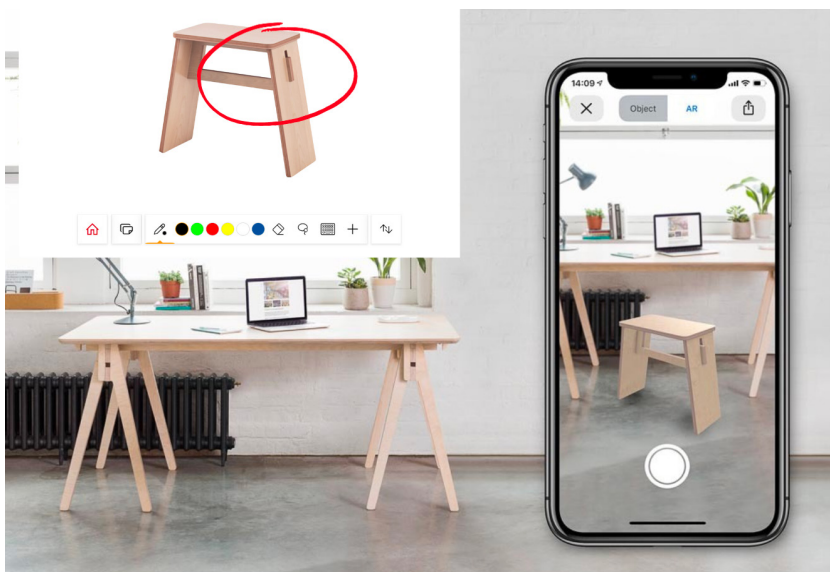

Mago Workspace: beyond the digital whiteboard

In conference rooms with interactive touch displays, in-room, and remote participants can wirelessly ink and annotate shared content in real-time from any device including a web browser.

This reduces the need to re-group after meetings to catch up on notes and increases your productivity time. No more forgetting to send notes to the team after meetings, since it is all captured natively and can be instantly shared.

Download Mago Workspace app and collaborate anytime.

Available for:

Expand your creativity: put your project in context

Scan real-life 2D/3D objects and share them on the whiteboard, be ready to empower your audience to get close to your project: zoom in, walk around, and bring value into focus.

Experience mixed-reality elements in their real-life size, and showcase them precisely when you need it.

Carry your entire project with you, in your pocket, saving your workspace on the Mago Workspace app.

Mago Collaboration Board
