What is an API?

An API is an application programming interface. Our API allows you to automatically feed the information in C+D Data directly into your chosen existing application or software.

Search   Integrate   Innovate   Present

Key Benefits

Fast: Quick and automatic integration into your applications
Flexible: Only receive the exact data you need, on demand when you need it
Collaborative: Reduce the time spent collating and checking data
Innovative: Address technical challenges, expand capabilities and provide a better experience

Features

- On demand delivery
- Dynamic feeds
- Tailored and configured
- Timestamped and versioned
