TG ESCAPES
modular eco-buildings

Trinity Catholic College and Sixth Form is part of the 'Nicholas Postgate Catholic Academy Trust' alongside schools from Middlesbrough, Stockton and Redcar. Their unique 11-18 school is vibrant and forward-thinking, meeting the changing needs of the young people and their families in the modern age. They wanted to provide a canteen facility where the students could socialise. TG Escapes modular solution was chosen, following feedback from the education sector, because of our inclusive design and build service. The college now has a multifunctional space that supports teaching and learning. Students have a place to eat and socialise. It creates a family culture and social dining experience.

Price £866k net at completion.

"TG Escapes completed construction works to our new 600 SQM dining hall to a high standard and delivered the program whilst the school was fully occupied by staff and students. The project was completed in 5 months and construction works were completed with minimal disruption to teaching and learning."

Matthew Laverick, Head of Estates and Facilities
