

boxxe

Tech Solutions

“Thanks to boxxe, we’ve witnessed a remarkable transformation in our IT infrastructure. Their expertise not only modernised our systems but also significantly enhanced our operational efficiency and strategic decision-making capability.”

ECS Group

IT Infrastructure

A Customer Success Story

Making
Tech Human™

IT Infrastructure customer success story

Results

Infrastructure modernisation

peak performance

Transitioned to the latest server platform, unifying disparate systems for peak performance.

Security reinforcement

cybersecure

Patched servers, switches, and firewalls, shoring up vulnerabilities and safeguarding data.

Operational efficiency

real-time solutions

Enabled strategic decision-making and real-time problem-solving with new dashboards and analytics.

Challenge

ECS Group faced efficiency issues due to outdated and disjointed server infrastructure.

Plan

To upgrade ECS's infrastructure to Windows Server 2019 for improved stability, security, and efficiency.

Approach

boxxe seamlessly transitioned ECS to a cloud-based VM, updated their systems, and implemented robust security and monitoring solutions.

Outcome

ECS Group now operates on a cutting-edge, harmonised platform that boasts enhanced efficiency, security, and reliability. The integration of real-time dashboards and predictive analytics has empowered them to make savvy technical and business choices. Their teams are free to focus on meaningful work, knowing their service delivery is top-notch and proactive.
