

Mago Room Essential

The new generation presentation system for wireless and wired sharing

Works over any network
No dongle to connect
No apps or drivers to install

Present and collaborate hassle-free in less than a second!

Wireless desktop sharing for PC/Mac

Screen sharing through AirPlay, Miracast, and Google Cast with support for connecting up to 8 devices simultaneously.

Content presentation, real-time editing, and instant collaboration

Multi-gesture trackpad and keyboard for controlling presentations and enabling seamless collaboration both in-person and remotely.

Content sharing with QR code, hassle-free

Content sharing without dongles or cables, network-independent, using a web browser or mobile app.

Recommended device

Mago Room Essential IoT device

The Mago Room Essential IoT device is a plug & play solution that includes all the power needed for the best experience, with the preinstalled Mago Room Essential software.

It takes just a few seconds to connect it to the network and start using the system in standalone mode or integrated with Microsoft Teams Room, Zoom Rooms, or Cisco Room Kit solutions.

When connected to interactive displays, it allows you to create collaborative whiteboards connected to the Mago cloud, your own cloud, or on-premise server. Meetings will be more engaging, and presentations will no longer experience delays.
