

Unify up to 10 disparate cybersecurity solutions

With Heimdal's singular, AI-powered, fully integrated suite that offers the ultimate defense-in-depth protection and empowers security teams to be proactive.

Elevate your enterprise protection with state-of-the-art security.

Given today's threat landscape, you need a crucial line of defense with an inherent advantage over legacy, signature-based solutions. Heimdal's offering has been built following a prevention-first approach, designed to catch all kinds of threats - simple and sophisticated, known and yet unknown.

From Network and Endpoint Security, to Vulnerability Management, Privileged Access Management, Email & Collaboration Security, Threat Hunting, and Unified Endpoint Management we clear up your most pressing security and compliance concerns - and more.

Heimdal's innovative, layered cybersecurity, powered by AI neural network-driven intelligence components, can be scaled up and down and will fit any business scenario.

Add the security layers you need. Unlock extra features and unexpected benefits.

Seamlessly integrated and fueled by Artificial Intelligence, the more modules you embed into your Heimdal ecosystem, the more intelligent it becomes.

And above all, you can conveniently manage everything from a single agent. Forget about disconnected solutions and gain a deep understanding and a complete overview of your environment, in real time.

AI-driven security tools that intelligently work together.

Combine DNS Security and Next-Gen Antivirus capabilities, add Privileged Access Management on top, or enhance your security posture with advanced Threat Hunting.

Gain a unique endpoint detection and response stance against know and unknow threats alike with Heimdal.

KEY FEATURES

- ✓ Widest XDR suite in the industry, featuring our 10-in-1 award-winning solutions
- ✓ Single unified console for managing all products across multiple attack surfaces
- ✓ Advanced threat intelligence powered by AI/ML, leveraging MITRE ATT&CK techniques, crowd-sourced intelligence, and supported by our human experts
- ✓ Cloud-native architecture with 99.9% uptime and no impact on system performance
- ✓ Instant solution deployment within minutes
- ✓ Deep, native bi-lateral telemetry between products, inventory, users and processes
- ✓ Dedicated Threat Hunting and Automated Response capabilities included
- ✓ Complements Microsoft 365 or Google Workspace environments
- ✓ Optional on-demand Managed SOC services available
- ✓ World-class support and dedicated customer service

Why Clients Love Heimdal®

"Solid security foundation product with a wide selection of features without being a drag to your system. We use almost every feature and we evaluate them before buying them. We get a lot of alerts that helps us initiate further actions and keeps our focus on the problems until they are solved. Keeps our business safer than before without the need of multiple vendor systems."

Stephan V, Head of Group IT,
Mid-Market (51-1000 emp.)

"We use Patch Management, E-mail Security and Remote Desktop modules from the Heimdal portfolio. All these products run through a single agent and consistently perform well. We push Microsoft patches every month to clients and servers without issue, Remote Desktop is simple to use as an admin, and E-mail Security Spam filtering catches the majority of bad things."

Administrator in Construction,
Mid-Market (51-1000 emp.)

"A solid dependable solution which works well. The best test is that I don't need to think about it on a daily basis, Heimdal simply does it's thing whilst I get on with tackling other problems. Heimdal oversees the security posture of our endpoints and tells me when things are not compliant or at risk, 9 times out of 10 it Heimdal remediates that risk and simply informs me."

Administrator in Oil & Energy,
Mid-Market (51-1000 emp.)

About Heimdal®

HEIMDALSECURITY.COM

Founded in 2014 in Copenhagen, Denmark, Heimdal® is a **leading European provider of cloud-based cybersecurity solutions.**

The company offers a multi-layered security suite that combines threat prevention, patch and asset management, endpoint rights management, and antivirus and e-mail security which together secure customers against cyberattacks and keep critical information and intellectual property safe.

Heimdal has been recognized as a **thought leader in the industry** and has won

multiple awards both for its solutions and for its educational content.

Currently, **Heimdal's cybersecurity solutions are deployed in more than 50 countries** and supported regionally from offices in 15+ countries, by 175+ highly qualified specialists. Heimdal is ISAE 3000 certified and secures **more than 3 million endpoints** for over 11,000 companies.
