Unify up to 10 disparate cybersecurity solutions

With Heimdal's singular, AI-powered, fully integrated suite that offers the ultimate defense-in-depth protection and empowers security teams to be proactive.

Elevate your enterprise protection with state-of-the-art security.

Given today's threat landscape, you need a crucial line of defense with an inherent advantage over legacy, signature-based solutions. Heimdal's offering has been built following a prevention-first approach, designed to catch all kinds of threats - simple and sophisticated, known and yet unknown.

From Network and Endpoint Security, to Vulnerability Management, Privileged Access Management, Email & Collaboration Security, Threat Hunting, and Unified Endpoint Management we clear up your most pressing security and compliance concerns - and more.

Heimdal's innovative, layered cybersecurity, powered by AI neural network-driven intelligence components, can be scaled up and down and will fit any business scenario.

Add the security layers you need. Unlock extra features and unexpected benefits.

Seamlessly integrated and fueled by Artificial Intelligence, the more modules you embed into your Heimdal ecosystem, the more intelligent it becomes.

And above all, you can conveniently manage everything from a single agent. Forget about disconnected solutions and gain a deep understanding and a complete overview of your environment, in real time.

AI-driven security tools that intelligently work together.

Combine DNS Security and Next-Gen Antivirus capabilities, add Privileged Access Management on top, or enhance your security posture with advanced Threat Hunting.

Gain a unique endpoint detection and response stance against know and unknow threats alike with Heimdal.

KEY FEATURES

- ✓ Widest XDR suite in the industry, featuring our 10-in-1 award-winning solutions
- ✓ Single unified console for managing all products across multiple attack surfaces
- ✓ Advanced threat intelligence powered by AI/ML, leveraging MITRE ATT&CK techniques, crowd-sourced intelligence, and supported by our human experts
- ✓ Cloud-native architecture with 99.9% uptime and no impact on system performance
- ✓ Instant solution deployment within minutes
- ✓ Deep, native bi-lateral telemetry between products, inventory, users and processes
- ✓ Dedicated Threat Hunting and Automated Response capabilities included
- ✓ Complements Microsoft 365 or Google Workspace environments
- ✓ Optional on-demand Managed SOC services available
- ✓ World-class support and dedicated customer service

Extended Detection and Response (XDR)

Achieve the next level in security - powered by the Heimdal Unified Security Platform.

Network Security Hunt, prevent, detect and respond to any threat.	Endpoint Security Mitigate and respond to next-gen cyberattacks.			Vulnerability Management Manage assets and mitigate vulnerabilities.
DNS Security - Network	DNS Security - Endpoint	Next-Gen Antivirus and MDM	Ransomware Encryption Protection	Patch & Asset Management
<p>Network & Endpoint Prevention, Detection and Response</p> <p>Unique threat hunting features and holistic visibility over your network</p> <p>Filtering capabilities added directly to your local network, regardless of whether it is cloud-based or on-prem</p>	<p>AI-based threat prevention based on powerful machine learning algorithms</p> <p>Real-time traffic scanning and infected domain blocking</p> <p>Unparalleled accuracy enhanced by threat intel</p> <p>The first solution on the market to integrate true DNS over HTTPS filtering</p>	<p>Four Advanced malware detection layers</p> <p>Certified detection rate of 100% for known malware</p> <p>Live process monitoring</p> <p>Powered by the proprietary Heimdal XTP engine</p> <p>Fully compatible with the Heimdal DNS offering</p>	<p>Accurate detection of file encryption processes</p> <p>Complete prevention of ransomware outbreaks</p> <p>Signatureless operation mode</p> <p>Compatible with any antivirus solution, including the Heimdal Next-Gen Antivirus and MDM</p>	<p>The most scalable and flexible patch and deployment product</p> <p>Preemptive and holistic vulnerability management</p> <p>Granular control of patches, installations, and deployments</p> <p>Global software asset management and deployment</p>

Privileged Access Management Manage, audit and comply in one easy step.		Email & Collaboration Security Eliminate the hassle and danger of email-borne threats.		Threat Hunting Leverage the power of unity in a single platform.	Unified Endpoint Management Securely connect to other devices
Privilege Escalation and Delegation	Application Control	Email Security	Email Fraud Prevention	Threat-hunting & Action Center	Remote Desktop
<p>Easy escalation of rights and files</p> <p>Full control of the escalation process</p> <p>World's only de-escalation upon threat discovery tool</p> <p>Auto-approval mode to avoid user support time</p> <p>Mobile approval supported</p> <p>Full audit trail</p>	<p>Whitelisting and blacklisting capabilities for any execution</p> <p>Easy control of access to execution of files</p> <p>Ability to easily manage spawns of any files executed</p> <p>World's only Application Control that can be tied with PEDM</p> <p>Handle access by file path, MD5, publisher, certificate or software name</p>	<p>MX record based and easy to implement</p> <p>Advanced spam detection</p> <p>Email filtering for malicious IP's, domains and URL's</p> <p>Email phishing prevention</p> <p>Efficient malware attachment removal</p>	<p>Advanced scanning for CEO fraud, business email compromise, incorrect IBAN numbers, and other signs of insider threat</p> <p>State-of-the-art detection based on 125+ vectors of mail fraud intelligence</p> <p>No more advanced malware emails delivered to your enterprise's inbox</p>	<p>Real-time enhanced visibility across your entire digital landscape</p> <p>The unencumbered power of intelligent insights that neutralize any adversaries</p> <p>Confident threat response within any environment</p> <p>Powered by the proprietary Heimdal XTP engine</p>	<p>Connect to any device with an agent</p> <p>Multi-Factor Authentication</p> <p>Attended / unattended Access i.e. end user request or IT accessed</p> <p>Works with PEDM through the session</p> <p>Clipboard sharing</p> <p>Video recording and audit log option</p>

Why Clients Love Heimdal®

"Solid security foundation product with a wide selection of features without being a drag to your system. We use almost every feature and we evaluate them before buying them. We get a lot of alerts that helps us initiate further actions and keeps our focus on the problems until they are solved. Keeps our business safer than before without the need of multiple vendor systems."

Stephan V, Head of Group IT,
Mid-Market (51-1000 emp.)

"We use Patch Management, E-mail Security and Remote Desktop modules from the Heimdal portfolio. All these products run through a single agent and consistently perform well. We push Microsoft patches every month to clients and servers without issue, Remote Desktop is simple to use as an admin, and E-mail Security Spam filtering catches the majority of bad things."

Administrator in Construction,
Mid-Market (51-1000 emp.)

"A solid dependable solution which works well. The best test is that I don't need to think about it on a daily basis, Heimdal simply does it's thing whilst I get on with tackling other problems. Heimdal oversees the security posture of our endpoints and tells me when things are not compliant or at risk, 9 times out of 10 it Heimdal remediates that risk and simply informs me."

Administrator in Oil & Energy,
Mid-Market (51-1000 emp.)

About Heimdal®

HEIMDALSECURITY.COM

Founded in 2014 in Copenhagen, Denmark, Heimdal® is a **leading European provider of cloud-based cybersecurity solutions.**

The company offers a multi-layered security suite that combines threat prevention, patch and asset management, endpoint rights management, and antivirus and e-mail security which together secure customers against cyberattacks and keep critical information and intellectual property safe.

Heimdal has been recognized as a **thought leader in the industry** and has won

multiple awards both for its solutions and for its educational content.

Currently, Heimdal's cybersecurity solutions are **deployed in more than 50 countries** and supported regionally from offices in 15+ countries, by 175+ highly qualified specialists. Heimdal is ISAE 3000 certified and secures **more than 3 million endpoints** for over 11,000 companies.

The company supports its partners without concessions on the basis of predictability and scalability, creating sustainable ecosystems and **strategic partnerships.**
