Mago Room

One interface, over 15 video conferencing systems

Get your whole team – wherever they are located – together with +15 VC systems supported, Mago Room displays scheduled meetings and allows participants to join a meeting with just one tap. Users can then seamlessly switch between video conferencing and workspaces at any time.

Through connections with Microsoft 365 or Google Calendar, you can join or start meetings almost instantaneously. Mago, with full-screen video conferencing makes worldwide collaboration smooth and seamless.

You can simply scan a QR code to take control of the room, with an intuitive, secure, and branded application launcher.

Mago Room includes

Mago Room Essential: A single solution for wireless screen sharing, real-time collaboration, and co-authoring

Meeting presentations can be challenging when employees are dispersed between the inability to connect personal devices to the display for wireless/wired presentation or disconnected, missing, and even faulty room equipment like dongles, cables (etc.)
All these meeting room pain points could affect ideas, collaboration, and productivity.

With Mago Room Essential you can easily connect to the room via a QR code using the Mago app, the cable-free and network-independent app for iOS, Android, and Windows. Alternatively, share your screen with the quickest browser-based solution using the room code on Magolink.com.

You can use the room touch display or the Mago app multi-gesture touchpad and keyboard to directly co-edit files and present contents.

Present your way

Airplay, Google Cast, Miracast powered by AirServer™

Project multiple screens and devices at the same time. Capture your casted content with a tap and brainstorm with Mago Workspace canvas.

Use Chrome Browser for PC or Mac

Share any any tab, window or full screen from your browser without installing any application

PIN code connect with Magolink

Ensure presenters share their content to the correct display and prevent unwanted streams.

Multi-network support

No need to connect to the same network to wirelessly present from your device. Mago Room Essential can cast content without compromising the security of your internal network, and it works even if your device is connected to a cellular network. Ensuring security by checking the physical presence.

Mago Workspace App

Browse your Cloud drives on the big screen. Present, collaborate and co-author your files directly without moving them out of your secure cloud drive. Works with OneDrive, Google Drive, Dropbox.

Mago Room Essential and UC integration

Mago Room Essential integrates well with a UC system like Microsoft Teams Rooms, Zoom Rooms and Cisco Room kit, making in-room and remote meeting experiences highly productive. In-room participants get the mobile and collaborative nature of the wireless screen sharing. At the same time, remote participants can view the shared content. Everything happens in real-time.

Available for: Microsoft Teams Rooms zoomrooms webex by CISCO

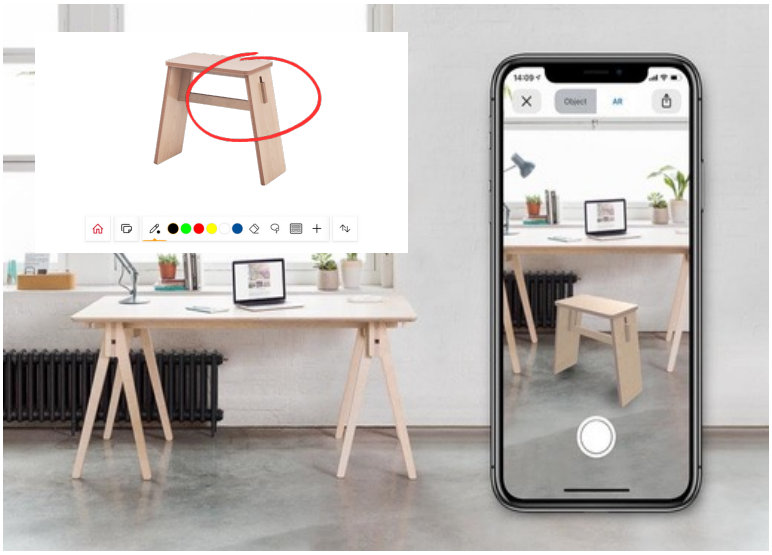
Mago Workspace: beyond the digital whiteboard

In conference rooms with interactive touch displays, in-room, and remote participants can wirelessly ink and annotate shared content in real-time from any device including a web browser.
This reduces the need to re-group after meetings to catch up on notes and increases your productivity time. No more forgetting to send meeting notes to the team after meetings since it is all captured natively and can be instantly shared.

Download Mago Workspace App and collaborate anytime, anywhere:

GET IT ON Google Play

Download on the App Store



Expand your creativity: put your project in context

Scan real-life 2D/3D objects and share them on the whiteboard, be ready to empower your audience to get close to your project: zoom in, walk around, and bring value into focus.
Experience mixed-reality elements in their real-life size, and showcase them precisely when you need it.
Carry your entire project with you, in your pocket, saving your whiteboards with Mago Workspace App.
