Models

| WHAT WE STAND FOR

Striving to create a high energy and dynamic culture where our colleagues can thrive, we are aiming to build a flexible, innovative, and rewarding organisation.

We believe that through well trained, highly motivated colleagues with the freedom to make the right decisions for our customers we can truly make a difference to your experience and to the patients we all ultimately serve.

| WHY CHOOSE US

Our Customer is at the Centre of Everything we do

We are committed to offering efficient and innovative processes to ensure we deliver an outstanding and dependable service, flexible to each customer's needs.

Genuine
Partnership

Comprehensive
Procedural Offering

Forward
Thinking

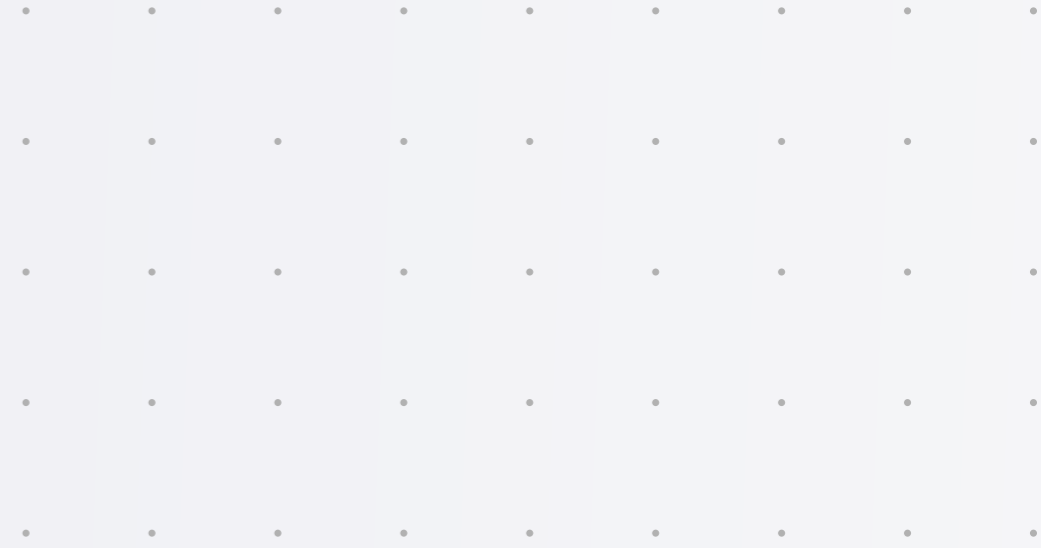

Led by our
Customers

Highest Quality
Standards

Our Focus

In everything we plan and do we always consider the impact on our three core pillars.

Our Customer

To become a skilled helper and grow deep and meaningful relationships with our customers to give unrivalled service, and customer experience

Our Communities

We will support the communities that we live in, through education, charitable activities and our time.

Our Colleagues

To make our working lives the best they can be, through ever improving colleague benefits, personal growth, and a fully involving culture.

Our Global Responsibility

To save our planet we have no alternative but to act now and leave a home for our future generations.

Sustainability must be at the forefront of every action we take. We are committed to not only reducing our own carbon impact but through our services to the NHS helping to identify and reduce their carbon emissions.

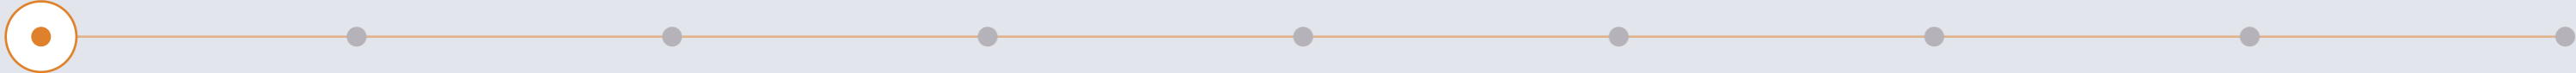

Our Plan for Better

Feasibility Study

We have conducted a major feasibility study looking at sustainability. We are partnering with a major National Health Service trust to identify the energy; water use and waste mix that is produced in the procedural cycle within gastroenterology to determine how Micro-Tech UK could support a unit in reducing carbon impact.

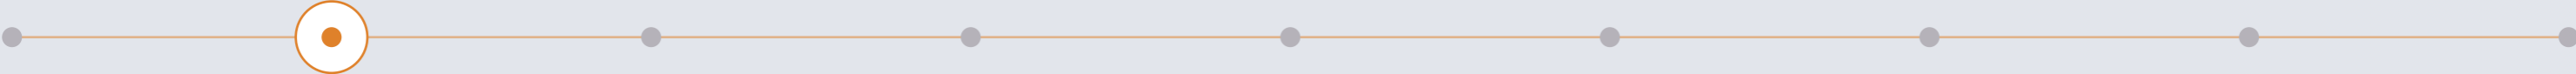

Our Plan for Better

2022 SME Climate Commitment

We have pledged to successfully adapt and design our company to be Carbon Neutral by 2030.

Our Plan for Better

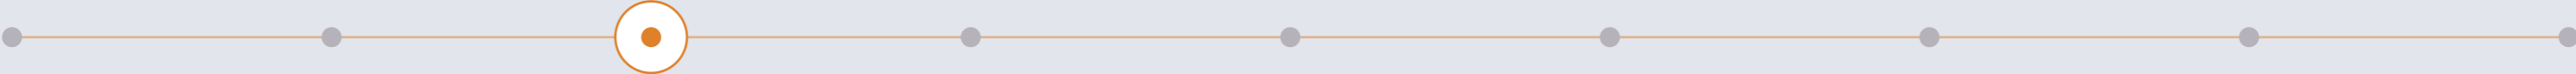

Cert No. 21556

2023

ISO 14001 Certification

Micro-Tech UK has now achieved the ISO 14001 certification. We will continue to reduce waste management costs, demonstrate our commitment to protecting the environment, and help our company comply with the increasingly stringent environmental laws and regulations.

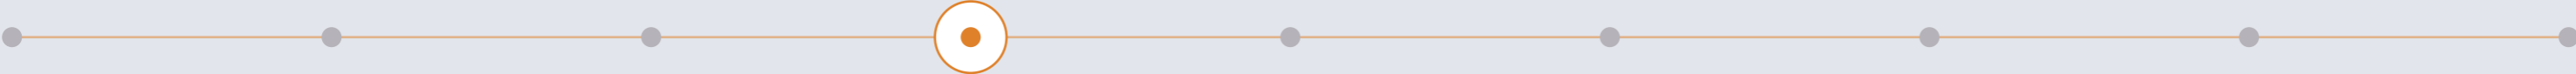

Our Plan for Better

Carbon Disclosure Project

We will be identifying and calculating our organisational carbon footprint and quantifying our Green House Gas emission sources in our first step towards reducing our damaging emissions.

Our Plan for Better

Develop our Carbon Reduction Plan

We will be outlining our journey to permanently reducing and eliminating where possible our organisational emissions, including our digital and environmental impact.

2024

Our Plan for Better

Implementing Fundamental Change

Micro-Tech UK will be collating our data, applying emissions factors and verifying our results.

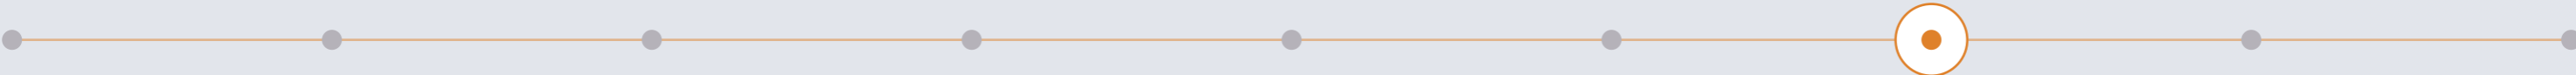

Our Plan for Better

Our Commitment to Colleagues

Is to aid them in reducing their personal carbon impact, through helping them identify their carbon usage and support them in how they might reduce emissions.

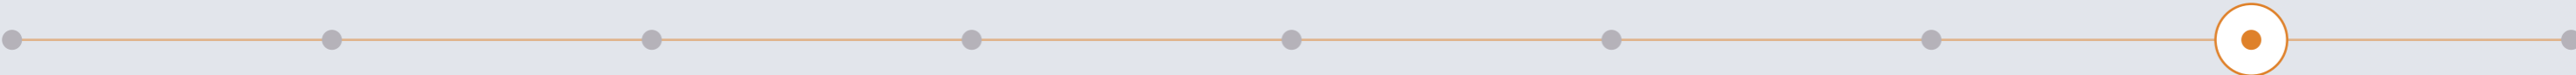

Our Plan for Better

Green Symposium

Micro-Tech UK will host a national Green Symposium to bring together like minded people together from the NHS, private hospital groups and environmental leaders to pave the way on how we can all work in partnership to work towards a greener future.

Our Plan for Better

2030

Carbon Neutral

Our mission to be a carbon neutral company will be complete and we will strive for further effective and innovative ways of ensuring we leave a home for our future generations.

Four Pillar Climate Strategy

Our journey toward climate neutral status focusses on four key pillars that are embedded in our iterative planning cycle and business strategy.

Pillar 1

**Our Own
Emissions**

Pillar 2

**Value Chain
Emissions**

Pillar 3

**Alignment
with the 1.5C
ambition**

Pillar 4

**Beyond our
own Business**

Our Climate Commitment

The environment and social challenges that are facing the world have never been greater.

Our climate commitment sets out our sustainability goals across our whole business, outlining our priority areas of focus, our key commitments, and our progress.

Where we are now

Climate change threatens the foundations of good health with direct and immediate consequences for our patients the public and the NHS.

6.3%

of the UK's total carbon emissions and 5% of the country's total air pollution are due to NHS activities.

36K

deaths annually are linked to air pollution which is connected to killer conditions like heart disease, stroke and lung cancer.

20M

Tonnes of Carbon Dioxide emissions a year the NHS is responsible for.

3KG

waste per bed-day generated by Endoscopy to the environmental footprint of health care.
