trust & cybersecurity.

Embracing your digital lifecycle while maintaining a 360° enterprise resilience.

In today's world, hyper-connectivity is again reinforced by the current health crisis.

that's why...

Devoteam helps organisations understand their threat landscape and manage risk by capitalising on its technological partners' innovative solutions. Via its three activities of consultancy, expertise (build) and Managed Security Services (run), Devoteam gives its clients adequate weaponry to meet the challenges of cybersecurity and inspire confidence.

concretely...

Secure Business
Optimise your cybersecurity resilience, risk and compliance posture.

business continuity & crisis management, integration of security in projects, vendor risk mgmt, security compliance mgmt, enterprise security risk mgmt

Secure Network
Confidently unleash the power of cloud without sacrificing security.

network private access, network segmentation, DDoS protection, secure access service edge (SASE), shadow IT

Secure Operations
Identify, understand and respond quickly to growing threats with next gen tools.

smart asset mapping, security audits & adversary emulation, threat intelligence, security operations center (SOC), incident response & remediation (CERT)

Secure Data
Protect your data from undesirables while providing authorized users with easy access to it.

data governance & compliance, data classification & categorization, data loss, leak protection & prevention, cloud data security, encryption

Secure Workplace
Engage in modern collaboration with proper identity and access.

zero trust access, workplace compliance, identity governance, privileged access, strong authentication, endpoint security

Secure DevOps
Empower your DevOps ecosystem to deliver secure applications faster.

security by design, integrated agile security, code auditing, API containers, training and acculturation, continuous security for workloads
