About the Event

Streamlining Care: The Digital Revolution in NHS Patient Flow Management

Patient Flow Transformation 2024 will explore how the NHS is adopting digital technologies to transform, accelerate, and integrate care services to improve patient flow.

We will hear from NHS leaders and colleagues who are leveraging the latest digital tools to reduce wait times, relieve pressure, improve patient outcomes, and enhance the overall care experience.

This unique event is a day focused on the prioritised themes of cross-system working, collaboration, innovation, digital advancements, challenge resolution and patient flow. With an array of engaging activities, including interactive breakout sessions, peer-to-peer roundtable discussions, panel talks, Q&As and one-to-one meetings, the entire event has been carefully curated around the current priorities of the NHS.

Our goal is to facilitate peer-to-peer conversations and sharing ideas of best practice between NHS colleagues, providing an interactive space to learn and explore how best to accelerate digital transformation.

Why Attend?

Patient Flow & Tracking

Discharge Support & Planning

Elective Backlog Recovery

Patient Safety & Experience

Utilising Data & Technology

Remote Care & Portals

We will be bringing together around 200 colleagues from within the NHS to connect, collaborate, inform and share experiences of digital transformation and innovation to enhance patient flow.

You will have the opportunity to interact with peers, as well as discuss your challenges with our solution provider teams in the networking sessions.

This event will provide you with an opportunity to learn more about how NHS organisations are utilising a comprehensive range of digital tools, together with innovative ideas and 'outside the box' thinking, to achieve streamlined integration of care services and enhanced patient flow, across urgent and emergency, and elective care.
