

# CARE: Medical Entitlements HealthCare Management Solution

CARE is a patient centered healthcare solution aimed at managing processes revolving around stocks of medical and non medical entitlements, facilitating processes with practitioners and health departments, while providing them with user-friendly and secure platforms.

It empowers you to efficiently manage medications and entitlements through eprescriptions, pharmacy dispensing recording, centralized management of stock and centralized patient records. This data-driven system can be connected to adhere to approved Government Formulary List regulations, ensuring compliance while transforming your healthcare system.

Discover the power of PTL's cutting-edge CARE solution, designed to streamline patient care, optimize workflows, simplify prescriptions, cost benefit through enhanced stock management and reporting, and boost patient data security.

# We empower organisations and practitioners, to save time, and improve patient focus.

## Key Features:

### Authentication

Seamlessly authenticate users through eID or Corporate Government Accounts. Verify registered doctors against the Medical Council's register of Doctors. Experience a simplified single sign-on process.

### Search, Retrieve, and Update

Access powerful search, retrieval, and update capabilities for patient data. Covering a wide range of patient demographics.

### Patient Profile

Gain valuable insights into a patient's medical history through their profile. Effortlessly apply for and renew patients medications or entitlements.

### Schedule V Management

Efficiently maintain and register entitlements for patients.

### Prescription Creation

Create prescriptions directly within CARE, simplifying the process upon Schedule V form submission.

With CARE, you'll experience a streamlined and efficient approach to healthcare management, ensuring compliance with government regulations and providing the highest standard of care for your patients.

We believe in a collaborative approach based in our experience and a proven track record of implementing health solutions at both an **organisational** and **national healthcare** level.

Our solutions have been co-created with healthcare institutions, ensuring tailored, efficient systems.
