

E-Prescription: A game changer for pharmacy workflows.

Reshape prescription workflow with PTL's innovative E-Prescription solution, offering enhanced drug to drug interactions notifications. The solution is designed to enhance efficiency and convenience for both patients and healthcare practitioners. Our cutting-edge system offers a paperless solution, eliminating prescription errors and streamlining the dispensing process. Experience a new era of healthcare with E-Prescription.

Discover the power of PTL's E-Prescription system. Schedule a demo today and experience a revolutionary shift in workflow, making prescriptions more efficient and practitioners lives easier.

We empower practitioners to save time, and improve patient convenience.

Key Features:

Complete Patient Overview

- Prevent prescription errors with a comprehensive view of patients' medical history and past medications.
- Offer patients the convenience of faster medication retrieval.

Efficient Dispensing

Streamline the dispensing process and improve overall pharmacy workflow.

A Feature-rich System

- Suitable for private clinics, local pharmacies, and private hospitals.
- Feature-rich system including doctor authentication, patient ID capture, retrieval and display of patient details, change request management, dosage and duration input, ad-hoc notes for doctors, prescription printing, and in-built reporting.

Going Paperless

- Transition to a paperless system that reduces waiting room queues and allows healthcare practitioners to focus on new patient cases.
- Securely transfer prescription information to the patient's chosen pharmacy, enabling faster medication filling.
- Integrate with the national healthcare system to apply medical subsidies, such as Schedule V entitlements and discounts, based on Government Formulary List criteria.
- Simplify patient verification through ID card presentation during medication collection.

We believe in a collaborative approach based in our experience and a proven track record of implementing health solutions at both an **organisational** and **national healthcare** level.

Our solutions have been co-created with healthcare institutions, ensuring tailored, efficient systems.
