VNA: Embracing the digital future of medical imaging and data sharing.

VNA (Vender Neutral Archive), empowers medical practitioners, healthcare organizations, and patients to share medical imaging data seamlessly, making them accessible through an enterprise viewer with seamless integration with most imaging vendors. As a trusted data, analytics, and technology partner in the healthcare industry, VNA enables real progress by reassembling information and insights for improved healthcare delivery, decision-making, and performance.

With VNA, you're embracing the future of medical imaging data sharing, ensuring greater accessibility, efficiency, and collaboration across the healthcare landscape. Join us in the journey of healthcare transformation.

We equip medical practitioners, organisations, and patients with a dynamic solution that revolutionises medical imaging, streamlining access to critical data and elevating the quality of patient care.

Key Features:

User-Friendly Enterprise Imaging Solutions
- Empower care teams to collaborate effortlessly and eliminate data silos by leveraging a single platform that accommodates multiple technologies.

- Seamlessly integrate with EMR systems for quick access to patient information tailored to each care team member's role and need, including patient access.

Hybrid Cloud Flexibility
- With over a decade of cloud expertise, we guide you on a flexible cloud journey, allowing seamless connections between on-premise and cloud applications.

- Adapt at your own pace, minimizing risks, leveraging existing investments, and maintaining control over your data.

AI-Enhanced Clinical Experience
- Infuse AI into your clinical operations to streamline processes, improve workflows, and enhance clinical outcomes.

- Boost provider satisfaction by providing valuable insights and automation, allowing them to focus on patient care.

Elastic and Scalable Solutions
- Our solutions are elastic and scalable, adjusting to your changing needs. Whether it's scaling up or down in storage, computing power, or cost, we've got you covered.

- Accommodate variations in system utilization during peak and trough hours, making it easy to adapt to changing market needs, expand or reduce locations, and support organic and inorganic growth.

We believe in a collaborative approach based in our experience and a proven track record of implementing health solutions at both an organisational and national healthcare level.

Our solutions have been co-created with healthcare institutions, ensuring tailored, efficient systems.
