Pentaho | **HITACHI** Inspire the Next

Discover Pentaho+

Channel the value of your data with our reliable modular and scalable platform.

Pentaho Data Integration

Consolidate data from different sources into a trusted basis for analysis and reporting with Pentaho Data Integration (PDI). Manage ever-growing data volume, variety, and velocity with our data-agnostic, no-code/low-code ETL tool that reduces the time and complexity of building and maintaining data pipelines.

Pentaho Business Analytics

Visualize your data, create reports, and design dashboards without depending on IT or developers with Pentaho Business Analytics (PBA), a powerful, cost-effective, and customizable no-code data visualization tool. Enable seamless, data-driven decision making and break down barriers to data access with real-time self-service capabilities and built-in data modeling.

Pentaho Data Catalog

Achieve greater data agility with less effort, less risk, and in less time with Pentaho Data Catalog (PDC). Trust your data with AI/ML-enabled data discovery, profiling, and classification, and simplify observability with a unified business glossary and advanced metadata management. See all your data—in any form, wherever it sits—and easily search, validate, and derive insights tailored to your unique business needs.

Pentaho Data Optimizer

Intelligently manage, maintain and tier data based on its business value, the cost of managing it, and any regulatory requirements with Pentaho Data Optimizer (PDO), a data storage tiering solution that reduces operating costs while improving performance and mitigating risk.

> " Pentaho has changed the way we handle data. Its ease of use and the responsive support team have made it possible for us to improve our data management processes in ways we didn't think were possible. We've unlocked new use cases, like vendor management and metadata management, and we're constantly finding more. "
