

KORE Helps Customers Manage Risks, Reduce Costs, and Improve Time to Market for Connected Health Deployments

Industry forecasts anticipate significant market expansion for remote patient monitoring solutions – including blood pressure monitors, pulse oximeters, respiratory monitors, and sleep monitors as well as outpatient monitoring devices such as pacemakers and defibrillators.

Primary drivers of this market growth include insurance-mandated policies that encourage the use of connected care technologies, as well as the aging population that is increasingly requiring remote healthcare services.

At KORE, we provide complete IoT device lifecycle services that enable healthcare solution providers to accelerate speed-to-market and drive efficiency at scale. Our services range from pre-production planning, staging and kitting to deployment and

returns management services and can include any or all of the components depending on your unique organisational requirements and budget. Certified to touch and handle medical devices, our team and processes assure quality controls and full regulatory compliance so you can focus on your core business while reducing total cost of ownership and maximising returns on IoT investments.

Implementation of remote patient monitoring solutions has potential to reduce the hospital admission rate by 60%.¹

Streamlining the process of:

Hardware Sourcing

Connectivity

Compliance

Configuration / Kitting

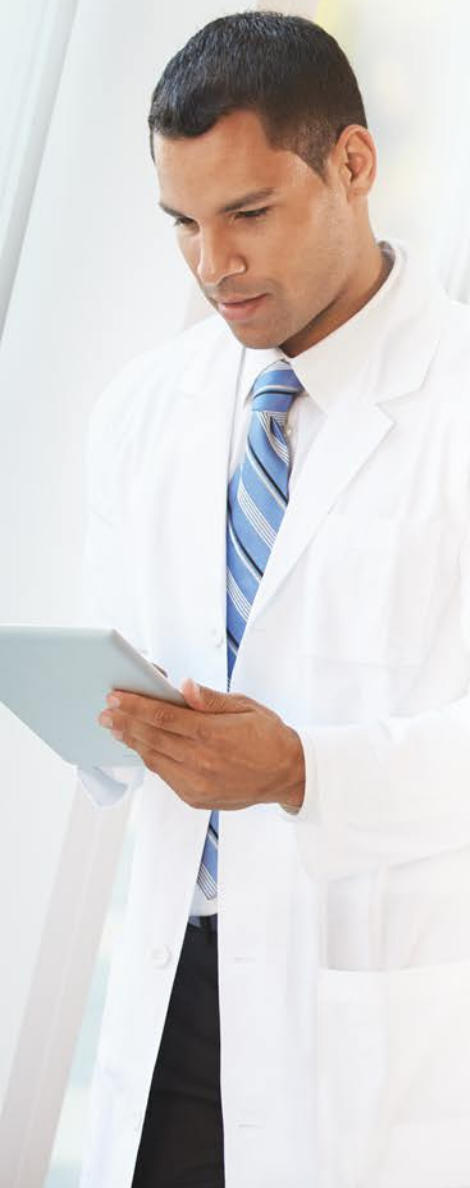

Logistics / Reverse Logistics

Device Management

KORE Manages the Complete IoT Device Lifecycle Enabling You to Efficiently Manage and Scale Your RPM Deployments

HARDWARE PROCUREMENT & ASSET MANAGEMENT

- Hardware & peripheral sourcing
- Houses customer owned inventory at a secure KORE facility
- Accurate inventory management via online asset management system
- Device certification services
- Distribution Centers in the U.S. & EU

STAGING & KITTING

- Custom software configuration, activation, and testing
- Installation of SIMs
- Software image management
- Peripheral integration & Bluetooth pairing
- Custom packaging of components
- Regulatory labeling & storage

GLOBAL CONNECTIVITY MANAGEMENT

- Multi-carrier connectivity for a global coverage
- Integrated view of wireless and asset management device attributes
- Both web portal and API implementation interfaces
- Powerful connectivity management tools to manage all your devices in a single platform

LOGISTICS, RECOVERY & REDEPLOYMENT

- Direct to patient or bulk fulfillment to hospitals and clinics
- Asset management, tracking & traceability
- Distribution centers in the U.S. & EU
- Returns processing, sanitise, test and repair
- Direct to patient recovery kits & redeployment

DEVICE/MOBILE DEVICE MANAGEMENT (MDM)

- MDM enrollment and license management
- Implementation and management

COMPLIANCE

- ISO 13485 / ISO 9001
- FDA 21 CFR Part 820 Compliant
- FDA Registered Repackaging & Contract Manufacturing Facility
- HIPAA Compliant Order Desk
- MDD Validation
- EU Medical Device Law Compliance
