WE SEE THE BIGGER PICTURE

VITAL
Radiology Services

WE GET IT RIGHT

Vital's high-quality definitive reports lead to informed clinical decisions. We can reduce your waiting lists, provide real-time information, and our automated processes reduce admin time and error.

REDUCE YOUR WAITING LISTS
PROVIDE REAL-TIME INFORMATION

OUR AUTOMATED PROCESSES REDUCE ADMIN TIME AND ERROR

BETTER REPORTS BASED ON THE FULL PATIENT HISTORY

Get better reports with Vital's proprietary platform which integrates into NHS systems, providing the full context of patients' history and prior images for our radiologists. This means we produce high-quality definitive reports that lead to informed clinical decisions and save time for the referrer.

OUR EXPERT RADIOLOGISTS

Vital recruit only the best radiologists – each and every one has been handpicked by our highly respected consultant partners - who are also shareholders.

Our team includes a large group of radiologists including those with subspeciality expertise:

	PAEDIATRIC	GI INCLUDING CT COLONOGRAPHY	GYNAECOLOGY	UROLOGY
CARDIAC	MSK	BREAST	NEURO	CHEST

Scans are directed to the most appropriate radiologists with experience and training in that area using our unique technology auto filter.
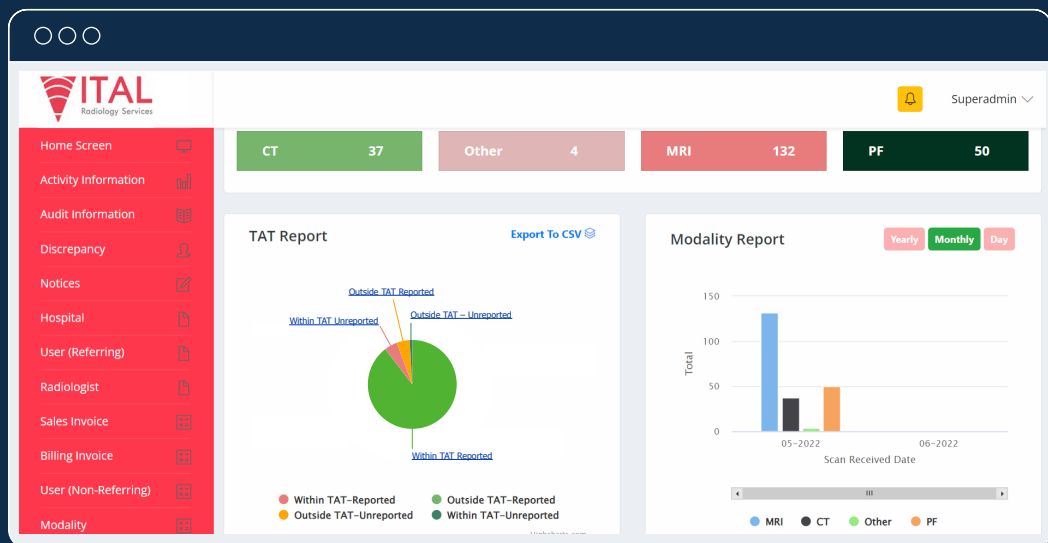

REDUCING WAITING LISTS WITH 24-7 REPORTING

Reduce your waiting lists with Vital's team of UK-based radiologists and subspecialty experts who are ready to support your imaging requirements.

In addition to the UK team, we work with radiologists in Australia and India to ensure around the clock reporting when needed.

FULL VISIBILITY VIA OUR UNIQUE DASHBOARD

We provide complete visibility on cases and scans with our unique dashboard which is owned by us and designed for the needs of NHS trusts. This also allows for clients to correspond with us with queries.
MORE EFFICIENT REPORTING

We increase efficiency and reduce admin time in teleradiology using Radicube, our automated workflow manager technology, a powerful tool which automates the day-to-day workflow involved in transferring images and related clinical data from radiology departments to Vital. Not only does this automation speed up the whole process, it also reduces manual input and administrative tasks while reducing clinical risk

VITAL
Radiology Services

→ At Vital Radiology, we produce better reports because we see the patient's full medical history and prior images.
